

REMARKS

The Examiner's Action mailed on June 14, 2006 has been received and its contents carefully considered.

In this Amendment, Applicants have amended title and Claim 1 in response to the title objection and claim rejection. Also, Applicants have added new claims 10-18 to further define the invention. Claims 1 and 10 are the independent claims. Claims 1-18 are pending in the application. For at least the following reasons, it is submitted that this application is in condition for allowance.

Initially, the Examiner has rejected claims 1-9 as being indefinite. The Examiner has stated that claim 1 is potentially unclear. In response thereto, claim 1 has been amended, and explained with regard to drawings as discussed below. Please refer to FIG. 10A. According to amended claim 1 of the invention, a rear plate includes a plurality of pixel electrodes, and every two pixel electrodes are paired as a pixel electrode group. For example, two pixel electrodes 1002 and 1003 are paired as a pixel electrode group, while two pixel electrodes 1004 and 1005 are paired as another pixel electrode group (FIG. 10A). Also, every two pixel electrode groups are separated by a *groove*, and the pixel electrodes of each pixel electrode group are separated by a *protrusion*. For example, the pixel electrode group containing pixel electrodes 1002, 1003 and adjacent pixel electrode group containing pixel electrodes 1004, 1005 are separated by the *groove 1013*. Also, pixel electrodes 1002, 1003 (paired in the

same group) are separated by a *protrusion 1015*; similarly, pixel electrodes 1004, 1005 (paired in the same group) are separated by a *protrusion 1025*. Thus, the grooves exist between the pixel electrode groups, and every pixel electrode group has a protrusion to separate the pixel electrodes of said group. As such, it is submitted that Applicants' independent claim 1, and the claims 2-9 dependent therefrom, are definite. It is requested that this rejection be withdrawn.

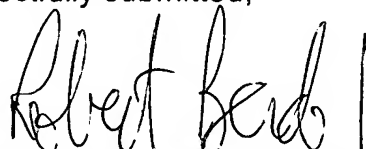

Also, the Examiner has rejected claims 1-9 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No 6,665,041. In response thereto, a **Terminal Disclaimer** is filed to overcome this rejection. It is requested that this rejection be withdrawn.

It is noted with appreciation that the Examiner considers claims 1-9 would be allowable if the rejections are overcome appropriately. Since the rejections are appropriately overcome, claims 1-18 of this application are clearly in condition for allowance. Allowance of the application and the passing of this case to issue are therefore respectfully requested.

If the Examiner believes that a conference would be of value in expediting the prosecution of this application, the Examiner is hereby invited to telephone the undersigned counsel to arrange for such a conference.

Should the remittance be accidentally missing or insufficient, the Commissioner is hereby authorized to charge the fee to our Deposit Account No. 18-0002, and advise us accordingly.

Respectfully submitted,

September 14, 2006
